Serialization basics → Serializable user

▂▁ Medium ⏱ 2 minutes ❓

Here is a class `User` with two fields `name` and `password` .

Make this class serializable excluding the `password` field from the serialization.

Please, add a field for version to follow the best practices.

⚡ See hint

√ Write a program

Code Editor   **IDE**

```Java
1  import java.io.Serializable;
2
3  class User implements Serializable {
4      private static final long serialVersionUID = 1L;
5      String name;
6      transient String password;
7  }
8
```

✓ **Correct.**

That's an awesome solution! What do you think about showing it off? Post it to Solutions so other learners can enjoy it too.
